webpack 4 examples:

- [starter without config file](#)
- [basic starter](#)

# Chapter 2. Quickstart

## 2.1. no config

*using webpack without `webpack.config.js` file*

```
mkdir starter-no-config
cd starter-no-config/

mkdir src dist
echo "console.log('hey!');" >> src/index.js
echo "<script src='./main.js'></script>" >> dist/index.html

npm init -y
npm i -g webpack webpack-cli
#npm i -DE webpack webpack-cli

webpack --mode=development
webpack --mode=production
```

## 2.2. basic config

*using webpack with basic config file: `onfig/webpack.dev.js`*

```
const { resolve } = require('path');

module.exports = {
  entry: {
    main: './src/index.js'
  },
  mode: 'development',
  output: {
    filename: '[name]-bundle.js',
    path: resolve(__dirname, '../dist'),
  },
};
```
